What readers say

Selected ✨Spellbinding and wrote

"This is one of the first (and only) AI email newsletters – yours AND others – that I have excitedly shared with friends and colleagues. Thank you for writing this one! We all feel it, but it's hard to admit for fear of thinking we're the only one."

Selected ✨Spellbinding and wrote

"I am new to AI, experimenting with a few of the MANY tools out there. I appreciate the frequency, poignancy, clarity and usefulness of your newsletter. Many thanks. "

Selected ✨Spellbinding and wrote

"Mostly deleting all other newsletters but you and your news(letter) is amazing and always some new interesting info.."

Selected ✨Spellbinding and wrote

"In a world of constant email streams, this is one I need to be sure I don't miss! Fascinating times. Thank you."

Selected ✨Spellbinding and wrote

"Love your emails man, one of the best newsletters in the AI space!"

Selected ✨Spellbinding and wrote

"It's great to have authentic relatable life experience, thanks for the emails"

Selected ✨Spellbinding and wrote

"This is going to be printed out and pinned on the fridge. Really relevant. Thx"

Selected ✨Spellbinding and wrote

"This newsletter is the quality content I am here for - seriously useful updates."

Selected ✨Spellbinding and wrote

"I made it to the bottom because I'm genuinely interested! Plus it's a good read - nice bite size chunks and relevant"

What's brewing in AI is a weekly newsletter that helps operators figure out where AI actually matters. I write from 1,000+ hours of my own experience building with Claude Code, and unique data I gather on how thousands of companies are actually using AI.

My audience consists of hands-on leaders and builders — from tech executives and founders to consultants and senior professionals — actively building, testing, and buying AI tools for their work.

Hi – I'm Dario. I started this newsletter in mid-2023. Over 200+ editions of building in public, sharing essential news, and honest commentary, I've earned a readership that trusts what I put in front of them.

By the numbers

Metrics verified on Passionfroot

- 20,000+ active subscribers
- 31% open rate
- 4% click-through rate
- 40-100+ estimated clicks per main ad
- 3 - 6$ estimated CPC

Source: subscriber survey (n = 944),
May 2025 to September 2026

65% of readers subscribed through organic acquisition (whatplugin.ai and my referral program), and have a higher click rate on ads compared to paid acquisition.

Read by leaders from influential companies

Audience - AI proficiency

Source: subscriber survey (n = 944), May 2025 to September 2026

More than half of the decision makers in the audience already use AI at an intermediate or advanced level, and they influence which tools their company buys. A strong fit for technical tools, developer platforms and enterprise AI.

Top goals with AI

- Grow revenue
- Save time
- Boost productivity

Top challenges with AI

- Lack of know-how
- Time constraints
- Trusting the output

Top use cases

- Writing and content
